

Math Enrichment
January 2010

Dear Parents,

This year we will be taking an exciting Math adventure. We will work on basic skills with a focus on multiplication and division through many fun-filled avenues. Hopscotch Math will have students working together to solve different problems and see how many facts they have memorized. Each problem and challenge will be presented in a creative way that will be sure to motivate each of them at their different levels.

We will use our time in class to cover the material, but they may have some challenge problems to work on at home. Please help them complete these assignments if they need it. I realize that this is enrichment so it won't take much time each week. They will receive an E, S or N based on how well they try and listen in class.

Whether you have a student who loves math or one who is having a hard time with these skills they will learn and have a good time with Hopscotch Math.

See you in January,

Gretchen Simmonds

Supplies Needed

- pencil
- paper
- two pocket folder
